

```

A. for(i=1; i<=2; i++) {
    if(!fork())
        printf("%d\n", i); // Child
    }
    printf("%d\n", i);
}
    
```

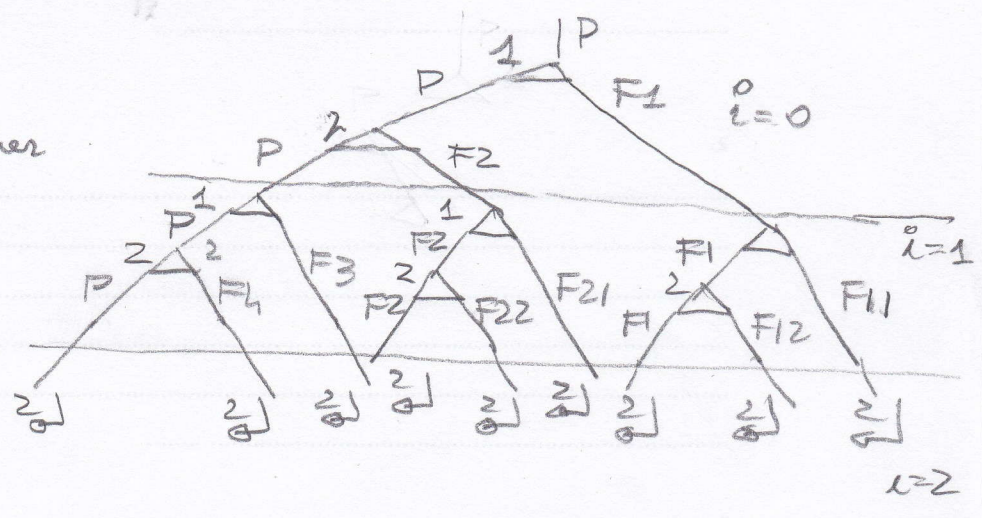

```

B. for(i=3; i>=1; i--) {
    if(fork())
        printf("%d\n", i); // Father
    }
    printf("%d\n", i);
}
    
```

```

C. for(i=0; i<=2; i++) {
    if(fork()) // 1
        fork(); // 2 = Father
    }
    printf("%d\n", i);
}
    
```

```

D. for(i=2; i>=1; i--) {
    if(!fork())
        printf("%d\n", -i); // Child
    else
        printf("%d\n", i); // Father
    }
}
    
```
